V Semester Section	:	K

ABSTRACT

Cricket Tournament Database is a cricket scheduling based application exclusively for the game of cricket.

The Database features :

1. About players
2. About teams
3. Matches schedule
4. Coaches information
5. Owners information
6. Umpires available
7. Stats of the players

The admin has all authorities to make changes for the database so admin can add players, can add schedules, can add stadiums, coaches, umpires etc and also have permission to removing of them from the database. It features with searching of players involved in the game and retrieve the players of the particular match by selecting Match_ID.

Also, can fetch the schedules with their venue and squad playing that match. Admin can also update the players runs and wickets and other match particulars in this database.

Tool Used

1. Front End : **STREAMLIT**
2. Backend : **MYSQL**

Queries

Join queries (at least 6)

Write the query in English Language, Show the equivalent SQL statement and also screenshot of the query and the results. Include 2 regular join, 2 co-related and 2 nested queries

QUERY 1 – REGULAR JOIN

Display all the details of the player and the team he plays for whose age is greater than or equal to 30.

Select * from players natural join team where Age>=30;

QUERY

Enter your query :

Select * from players natural join team where Age>=30;

Submit

Results of your query (Select * from players natural join team where Age>=30)

	Team_ID	Player_ID	First_Name	Last_Name	Age	Team_Name	Owner_ID
0	T101	BA101	Rohit	Sharma	35	Mumbai Indians	O101
1	T102	BA102	Virat	Kohli	34	RCB	O102
2	T103	BA103	MS	Dhoni	40	CSK	O103
3	T105	BA105	Hardik	Pandya	30	Gujarat Titans	O105
4	T105	BO105	Mohammed	Shami	35	Gujarat Titans	O105

Query executed successfully..

QUERY 2 – REGULAR JOIN

Display the team name and the date on which it is going to play.

Select Team_Name, MDate from plays as p natural join team join matches as m where m.Match_ID= p.Match_ID;

Enter your query :

Select Team_Name, MDate from plays as p natural join team join matches as m where m.Match_ID= p.Match_ID;

Submit

Results of your query (Select Team_Name, MDate from plays as p natural join team join matches as m where m.Match_ID= p.Match_ID)

	Team_Name	MDate
0	Mumbai Indians	2022-11-01
1	Gujarat Titans	2022-11-01
2	RCB	2022-11-02
3	Punjab Kings	2022-11-02
4	Mumbai Indians	2022-11-03
5	CSK	2022-11-03
6	RCB	2022-11-04
7	Punjab Kings	2022-11-04
8	CSK	2022-11-05
9	Gujarat Titans	2022-11-05

Query executed successfully..

QUERY 3 – CORRELATED QUERY

Display the details of Players and Match ID who is a Batsman and scored less runs than his overall average.

```
select distinct Player_ID, First_Name, Last_Name, Runs, Match_ID from players natural join
stat where runs < (select AVG(runs) from stat where stat.Player_ID = players.Player_ID) and
stat.Player_ID like 'BA%';
```

QUERY

Enter your query :

```
select distinct Player_ID, First_Name, Last_Name, Runs, Match_ID from
players natural join stat where runs < (select AVG(runs) from stat where
stat.Player_ID = players.Player_ID) and stat.Player_ID like 'BA%';
```

Submit

Results of your query (select distinct Player_ID, First_Name, Last_Name, Runs, Match_ID from players natural join stat where runs < (select AVG(runs) from stat where stat.Player_ID = players.Player_ID) and stat.Player_ID like 'BA%')

	Player_ID	First_Name	Last_Name	Runs	Match_ID
0	BA101	Rohit	Sharma	9	M103
1	BA102	Virat	Kohli	31	M104
2	BA103	MS	Dhoni	17	M105
3	BA104	KL	Rahul	0	M102
4	BA105	Hardik	Pandya	31	M101

Query executed successfully..

QUERY 4 – CORRELATED QUERY

Display the name of the umpires who have umpired matches in Mohali.

Select Umpire_ID,Umpire_Name,Match_ID from umpire natural join referee where exists
(Select 'X' from matches where stadium='Mohali' and referee.Match_ID=matches.Match_ID);

QUERY

Enter your query :

```
Select Umpire_ID,Umpire_Name,Match_ID from umpire natural join  
referee where exists (Select 'X' from matches where stadium='Mohali'  
and referee.Match_ID=matches.Match_ID);
```

Submit

Results of your query (Select Umpire_ID,Umpire_Name,Match_ID from umpire
natural join referee where exists (Select 'X' from matches where
stadium='Mohali' and referee.Match_ID=matches.Match_ID))

	Umpire_ID	Umpire_Name	Match_ID
0	U101	Anil Choudary	M104
1	U104	Marais Erasmus	M104
2	U105	Chris Gaffaney	M104

Query executed successfully..

QUERY 5 – NESTED QUERY

Display details of players whose Coach ID is C1011 or C1012.

Select * from players where Team_ID in (Select Team_ID from coach where Coach_ID='C1011' or Coach_ID='C1012');

QUERY

Enter your query :

```
Select * from players where Team_ID in ( Select Team_ID from coach
where Coach_ID='C1011' or Coach_ID='C1012');
```

Submit

Results of your query (Select * from players where Team_ID in (Select Team_ID from coach where Coach_ID='C1011' or Coach_ID='C1012'))

	Player_ID	First_Name	Last_Name	Age	Team_ID
0	BA101	Rohit	Sharma	35	T101
1	BO101	Jasprit	Bumrah	28	T101

QUERY 6 – NESTED QUERY

Display all the umpires present in the matches when RCB has won.

```
select Umpire_ID, Umpire_Name from umpire where Umpire_ID in ( Select Umpire_ID
from referee where Match_ID in ( Select Match_ID from matches where Winning_Team='RCB'));
```

QUERY

Enter your query :

```
select Umpire_ID, Umpire_Name from umpire where Umpire_ID in (
Select Umpire_ID from referee where Match_ID in ( Select Match_ID from
matches where Winning_Team='RCB'));
```

Submit

Results of your query (select Umpire_ID, Umpire_Name from umpire where Umpire_ID in (Select Umpire_ID from referee where Match_ID in (Select Match_ID from matches where Winning_Team='RCB')))

	Umpire_ID	Umpire_Name
0	U102	Kumar Dharmasena
1	U103	Nitin Menon
2	U104	Marais Erasmus

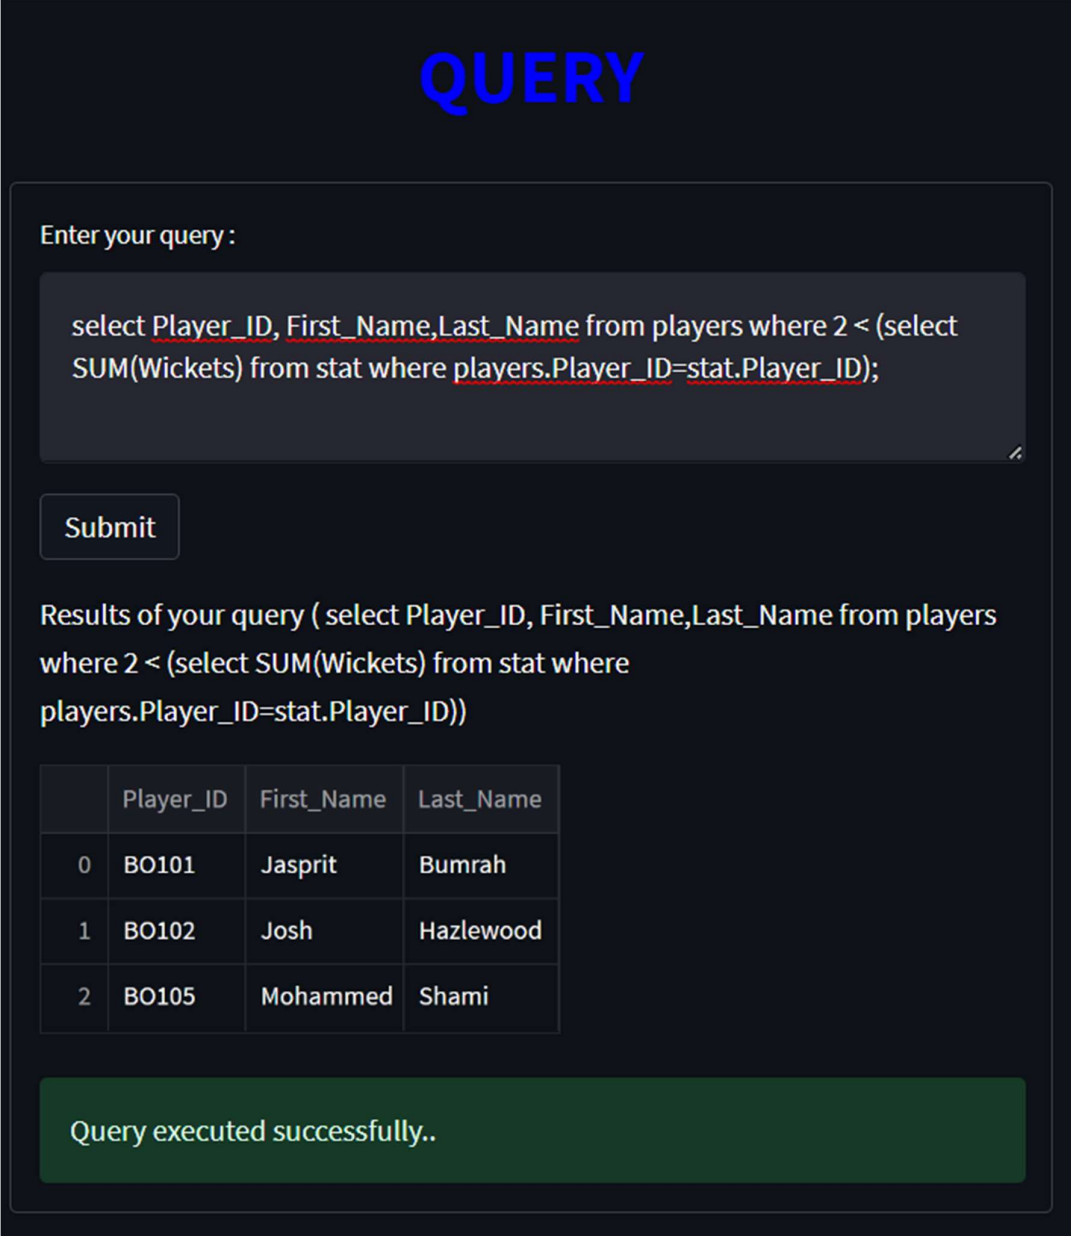

Query executed successfully..

Aggregate Functions

Showcase at least 2 Aggregate function queries. Write the query in English Language, Show the equivalent SQL statement and also screenshot of the query and the results

1. Display the player details who have taken more than 2 wickets.

select Player_ID, First_Name, Last_Name from players where 2 < (select SUM(Wickets) from stat where players.Player_ID=stat.Player_ID);

The screenshot shows a web-based SQL query interface. At the top, the word "QUERY" is displayed in large blue letters. Below it, a text input field contains the SQL query: `select Player_ID, First_Name, Last_Name from players where 2 < (select SUM(Wickets) from stat where players.Player_ID=stat.Player_ID);`. A "Submit" button is located below the input field. The results of the query are displayed below the button, showing a table with 4 columns: an index, Player_ID, First_Name, and Last_Name. The table contains 3 rows of data. At the bottom, a green message box states "Query executed successfully..".

Enter your query :

```
select Player_ID, First_Name, Last_Name from players where 2 < (select SUM(Wickets) from stat where players.Player_ID=stat.Player_ID);
```

Submit

Results of your query (select Player_ID, First_Name, Last_Name from players where 2 < (select SUM(Wickets) from stat where players.Player_ID=stat.Player_ID))

	Player_ID	First_Name	Last_Name
0	BO101	Jasprit	Bumrah
1	BO102	Josh	Hazlewood
2	BO105	Mohammed	Shami

Query executed successfully..

2. Display the number of matches played by each player.

```
select Player_ID, First_Name, Last_Name, Count(Player_ID) as Matches_Played from  
players natural join plays group by Player_ID ;
```

Enter your query :

```
select Player_ID, First_Name, Last_Name, Count(Player_ID) as  
Matches_Played from players natural join plays group by Player_ID ;
```

Submit

Results of your query (select Player_ID,
First_Name, Last_Name, Count(Player_ID) as Matches_Played from players
natural join plays group by Player_ID)

	Player_ID	First_Name	Last_Name	Matches_Played
0	BA101	Rohit	Sharma	2
1	BA102	Virat	Kohli	2
2	BA103	MS	Dhoni	2
3	BA104	KL	Rahul	2
4	BA105	Hardik	Pandya	2
5	BO101	Jasprit	Bumrah	2
6	BO102	Josh	Hazlewood	2
7	BO103	Deepak	Chahar	2
8	BO104	Arshdeep	Singh	2
9	BO105	Mohammed	Shami	2

Set Operations

Showcase at least 2 Set Operations queries . Write the query in English Language, Show the equivalent SQL statement and also screenshot of the query and the results

1. Display the players who have played in Mohali or Wankhede Stadium.

(select Player_ID, First_Name, Last_Name, Stadium from players natural join plays natural join matches where stadium = 'Wankhede')

UNION

(select Player_ID, First_Name, Last_Name, Stadium from players natural join plays natural join matches where stadium = 'Mohali');

Enter your query :

```
(select Player_ID, First_Name, Last_Name, Stadium from players natural
join plays natural join matches where stadium = 'Wankhede' ) UNION
(select Player_ID, First_Name, Last_Name, Stadium from players natural
join plays natural join matches where stadium = 'Mohali')
```

Submit

Results of your query ((select Player_ID, First_Name, Last_Name, Stadium from players natural join plays natural join matches where stadium = 'Wankhede') UNION (select Player_ID, First_Name, Last_Name, Stadium from players natural join plays natural join matches where stadium = 'Mohali'))

	Player_ID	First_Name	Last_Name	Stadium
0	BA101	Rohit	Sharma	Wankhede
1	BA105	Hardik	Pandya	Wankhede
2	BO101	Jasprit	Bumrah	Wankhede
3	BO105	Mohammed	Shami	Wankhede
4	BA102	Virat	Kohli	Mohali
5	BA104	KL	Rahul	Mohali
6	BO102	Josh	Hazlewood	Mohali
7	BO104	Arshdeep	Singh	Mohali

2. Display the Names of Umpires who have umpired in both matches Match ID = 'M101' and Match ID = 'M103'.

```
(select Umpire_ID,Umpire_Name from umpire natural join referee where
Match_ID="M101")
INTERSECT
(select Umpire_ID,Umpire_Name from umpire natural join referee where
Match_ID="M103");
```

QUERY

Enter your query :

```
(select Umpire_ID,Umpire_Name from umpire natural join referee where
Match_ID="M101") INTERSECT (select Umpire_ID,Umpire_Name from
umpire natural join referee where Match_ID="M103");
```

Submit

Results of your query ((select Umpire_ID,Umpire_Name from umpire natural join referee where Match_ID="M101") INTERSECT (select Umpire_ID,Umpire_Name from umpire natural join referee where Match_ID="M103"))

	Umpire_ID	Umpire_Name
0	U103	Nitin Menon

View

Demonstrate creation and querying one view.

Creating View:

create view v1 as (Select p.Player_ID,First_Name,Last_Name,Runs,Wickets,Match_ID from players as p join stat as s where p.Player_ID=s.Player_ID);

```
MariaDB [cricket_tournament]> create view v1 as (Select p.Player_ID,First_Name,Last_Name,Runs,Wickets,Match_ID from players as p join stat as s where p.Player_ID=s.Player_ID);
Query OK, 0 rows affected (0.383 sec)

MariaDB [cricket_tournament]>
```

Querying using View:

Display all the matches and players who scored more than 30 runs or took atleast 1 wicket.

select * from v1 natural join matches where runs>30 or wickets>=1;

```
MariaDB [cricket_tournament]> select * from v1 natural join matches where runs>30 or wickets>=1;

Developing a Frontend

The frontend should support

- 1. Addition, Modification and Deletion of records from any chosen table

- 2. There should be a window to accept and run any SQL statement and display the result
